## Dell Optiplex/Precision Header Adapter Kit (Optiplex 790/990 & Precision T1600)

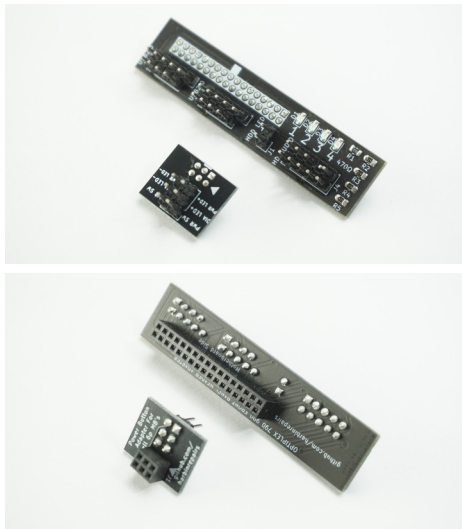

Revision 1.0

### - Package Contents -

- 1 – Power LED/Button Adapter
- 1 – Front Panel I/O Adapter

### - Usage -

This kit is designed for the DT & MT mid tower (not SFF or small form factor) desktops. It allows you to connect standard PC case I/O headers to the Dell **Optiplex 790/990 & Precision T1600** motherboards. These are often used to build budget gaming PC's using decommissioned office desktops and convert them to work with modern PC cases. The images to the right show where these adapters need to be connected and the orientation. The numbered LED's correspond to the numbered LED's that were originally on the front of the case to indicate error codes. **Warning, connecting these adapters in the wrong orientation could result in damage to your motherboard. Do not use these adapters with models other than the ones mentioned above.** More information and installation video can be found linked in our Github repository here: [github.com/HarbinRepairs/Dell-Optiplex-MB-Header-Adapters](https://github.com/HarbinRepairs/Dell-Optiplex-MB-Header-Adapters)

Harbin Repairs is not affiliated with Dell in any way shape or form.
